EDUCATION

 **ALTON COLLEGE**
1 A Level, 3 BTECs
2016 - 2019

 **UNIVERSITY OF PLYMOUTH**
BSc, Computer Science
2019 -

EXPERIENCE

GENERAL

I started coding around 12 years old; since then, I have learned C#, C++, Java, Python, Pascal, Visual Basic and some other languages, as well as coding in Assembly Languages. I have experience working in groups e.g., a yearlong University group project in which I was the Technical Lead and have done some work experience at a tech company called "TheNAVPeople". I have completed my second year at university, have completed an A-Level in Computer Science, and BTECs in IT, Applied Science and Engineering.

BARTENDER / WAITER

Aug 2018 – Aug 2019

Although it's not in a technical field, I thought I'd include work at the two pubs I was employed at. Working there helped me improve my ability to both work with the public, and as a part of a team – greatly improving my communication skills.

SKILLS

<div></div>	Teamwork
<div></div>	Programming / Coding
<div></div>	Customer Service
<div></div>	Sailing – RYA level 4
<div></div>	Instruments – Guitar, Bass, Piano
